LANGUAGES

- Spanish(native)
- English(fluent)
- German(Basic)

SKILLS

- PHP 8+, Laravel,(Livewire, Breeze, Jetstream, Filament, Bagisto)
- HTML5, CSS3, JavaScript (ES6), TailwindCSS
- PayPal, Stripe, SMTP (Gmail), API Integrations
- MySQL Design, Optimization, Security
- Shared Hosting, FTP, SSH, DNS, Domain Management
- Git, GitHub, Composer, AJAX (Fetch API)
- Siemens S7-1200, TIA Portal

KNOWLEGDE

- Full-stack debugging and troubleshooting
- Server deployment & domain management
- eCommerce development with Bagisto
- Admin panel creation with Filament
- API integration & automation
- Electronic systems maintenance
- Cisco Networking

CERTIFICATES

- Full web development
- Laravel
- Cisco Networking

PROFILE

Full-Stack PHP/Laravel Developer with strong expertise in backend and frontend development, server management, and integration of open-source platforms. With a background in mechatronics engineering and technical maintenance, I bring a multidisciplinary approach to problem-solving and project execution. Skilled in designing, developing, and deploying secure and scalable web applications with modern PHP frameworks, including Laravel, Livewire, Breeze, Jetstream, Filament, and Bagisto. Experienced in server configuration, payment gateway integrations, and database optimization. I am passionate about building reliable solutions that combine software development with solid technical foundations.

WORK EXPERIENCE

FULL-STACK PHP/LARAVEL DEVELOPER
dic 2023 - Present| Freelance

- Development of secure web applications using PHP, Laravel, Livewire, Breeze, and Jetstream, applying best security practices such as user authentication and data encryption. Experience in Open source Bagisto
- Payment gateway integrations with PayPal and Stripe.
- Server configuration, deployment, and domain management for clients using Domcloud, ForwardDomain.net, and GoDaddy.
- SMTP email server configuration using Gmail for transactional and notification emails.
- Implementing dynamic user interfaces with AJAX (Fetch API).
- MySQL database design, indexing, security, and optimization.
- Documentation of development processes and version control with Git & GitHub.
- Client collaboration for technical requirement analysis and solution delivery.

ELECTRONIC WORKSHOP SUPERVISOR
July. 2020 - oct. 2023| Electronica Leo

- Maintenance and repair of complex electronic systems, such as power supplies, voltage transformers, and industrial systems.
- Troubleshooting and repair of faults in electronic components of high-performance systems and industrial equipment.
- Leadership and supervision of a team of technicians, ensuring efficient repairs according to quality standards.
- Management of electronic component inventory, ensuring availability of parts for urgent repairs and ongoing maintenance.

TECHNICAL MAINTENANCE SUPERVISOR
april. 2019 - march. 2020 | FRUIT OF THE LOOM(VFI)

- General maintenance and repair of industrial equipment, including forklifts and Raymond elevating towers, covering both mechanical and electrical systems.
- Energy efficiency improvements in the plant by replacing electrical systems to reduce energy consumption in the warehouses.
- Preventive and corrective maintenance across the entire export plant, ensuring equipment and system availability and safety.
- Maintenance of hydraulic and electrical systems, including optimization of water systems with Siemens S7-1200 PLC for the proper functioning of pumps and other components.
- Electrical and mechanical maintenance in various areas of the plant, ensuring the continuous operation of equipment and infrastructure.

EDUCATION

2014 - march 2020(On-site)
Bachelor of Engineering in Mechatronics
Universidad Tecnológica Centroamericana[UNITEC][Honduras, Cortés]

2018-2018(On-site)
Mechatronic design, Mechatronic System(150 hours)
Universidad Politécnica de Valencia[UPV][España, Valencia]

2000 - 2013(On-site)
High School Diploma of Science and Letters, basic school life completed.
Alfa & Omega[Honduras, Copán]
